CPVS (40-50) PM
Oil-Injected
Screw Compressors

People. Passion. Performance.

Chicago
Pneumatic

www.mfcp.com

Your compressor powers your entire production, or at least a significant part. You simply can't afford an air system that doesn't work for you. Chicago Pneumatic's Fixed speed CPCg (40-60) and brand-new CPVS (40-50) PM deliver the reliable and cost-efficient performance that will give you that necessary peace of mind. Thanks to the CPVS (40-50) PM's iPM technology, you even enjoy unrivaled energy savings. Compact and quiet, a Chicago Pneumatic 40-60 hp compressor will be the undemanding, yet powerful heart of your compressor room for years to come.

Superior Build

- Updated, small footprint to save space and reduce noise levels.
- Reliable operation, even in ambient temperatures of up to 115°F.
- The IP66-enclosed drive train provides dependable performance in dusty and humid conditions.
- Maintenance-free components ensure higher uptime and productivity.
- iPM direct drive guarantees premium reliability.

Low Cost of Ownership

- On average 30% smaller footprint than most competitors.
- Up to 45% energy savings with the CPVS (40-50) PM's IE4 iPM motor.
- Integrated direct drive transmission allows for minimal losses.
- Advanced ES4000T touchscreen controller maximizes performance and efficiency.

A Complete Offering

CPCg 40-60 Fixed-speed

- On average 30% smaller footprint than most competitors
- Gear drive contributes to high reliability in tough conditions
- Ideal workhorse for compressor rooms with long duty cycle operation

+ TCO* savings

CPVS 40-50 PM

Performance

- Oil-cooled iPM drive train for high performance cooling and best-in-class performance

Serviceability

Lifetime

- Energy savings of up to 45%
 - iPM motor equals IE4 standards
 - Payback within 1-2 years for upgrade from fixed-speed to iPM

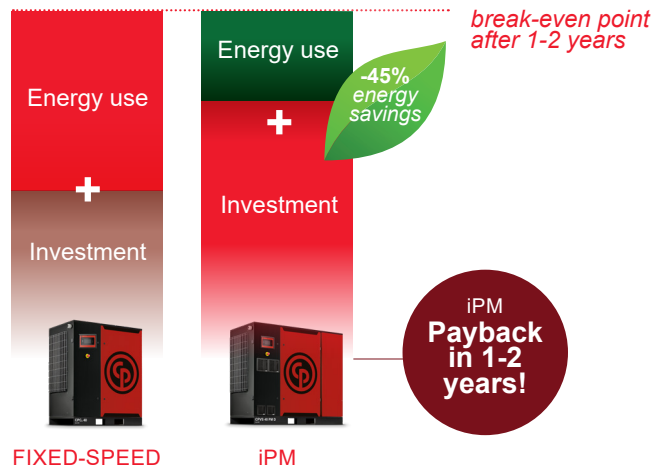

Compact & quiet

The CPCg (40-60) and CPVS (40-50) PM can be placed in a compressor room or directly on your production floor. Typically, neither has much room to spare. That is why the units take up very little space. In addition, our 40-60 hp compressors are super silent with sound levels as low as 67 db(A) to protect the health and comfort of your employees.

iPM for major energy savings

Energy takes up more than 70% of the cost of owning and operating a compressor. Chicago Pneumatic's iPM technology was developed to give you significant energy savings. While traditional compressors only have one speed (100% on), iPM compressors adjust their motor speed to follow the fluctuating air demand that most production environments have. As a result, the CPVS (40-50) PM delivers up to 45% energy savings. That means you can earn back your choice for the CPVS (40-50) PM in just one to two years. How's that for a financial no-brainer?

Payback in 1-2 years

ICONS

Increased uptime, powered by ICONS

With the Intelligent CONnectivity System (ICONS), you get data and insights from your machines delivered to your computer, tablet or smartphone.

- Increase the reliability of your machine by identifying problems before they become a threat to the continuity of your production.
- Analyze and optimize your energy consumption and CO₂ emissions.
- Receive high-quality energy reports ensuring the ISO50001 compliance of your site.

Advanced Technology for Best-in-Class Performance

In-house designed IE4 efficiency and class H interior permanent magnet (iPM) motor:

Maintenance-free; includes innovative oil-cooling technology for optimal performance in up to 115°F.

In-house designed compression element:

Gives you best-in-class Free Air Delivery and Specific Energy Requirement.

IP54 electrical cubicle:

Can withstand up to 140°F and is IP54 protected.

Drive train:

IP66-rated for complete protection from dust and moisture.

Radial fan:

Gives you improved pressure build-up and quiet operation.

A Range of Options

- Integrated energy recovery
- Freeze protection
- IE4 fixed-speed motor
- WSD & Electronic water drain
- 8000-hour premium synthetic oil
- Heavy-duty pre-filtration
- Food-grade oil
- ECO6i

Mission Possible: Energy Efficiency

Energy constitutes by far the biggest cost of owning and operating a compressor. Luckily, there are many options to minimize the energy consumption of your air system. Technologies such as energy recovery can have a huge impact on your bottom line and your environmental footprint, with energy savings of up to 75%. A holistic view of your compressed air system is key. It starts with the selection of efficient technologies when buying your compressor. But it doesn't end there. Monitoring and analyzing your air system as you use it will often reveal optimization opportunities. Your Chicago Pneumatic representative can help you find those savings.

One Source for All of Your Air Needs

Chicago Pneumatic stands ready to meet all of your compressed air needs: From the ① compressor itself, to ② air dryers and ③ line filters, ④ oil-water separators, ⑤ air receiver buffer storage, ⑥ our own easy-to-install AIRnet piping system, and ⑦ a central controller to manage the entire system.

State-of-the-art Monitoring, Control & Connectivity

How do you get the most out of your CPCg (40-60) and CPVS (40-50) PM? It's all about monitoring, control and connectivity. The state-of-the-art ES4000T touchscreen controller gives you on-screen and remote insight into the performance of your compressor so you can optimize its efficiency, reliability and lifetime:

- Large 4.3" full-color touchscreen display
- 30+ languages
- Warning indications and shutdown alarms
- Service status and schedule indication
- Online visualization of running conditions
- Compressor data analysis

Enhance Your Air System Performance With the EControl6i

EControl6i

Are you operating multiple compressors? The CPCg (40-60) and CPVS (40-50) PM can be optionally equipped with the **EControl6i** central controller to synchronize your different units. The result: a smooth running air system with a low Total Cost of Ownership.

- Generate energy savings by narrowing the operating pressure band.
- Save on maintenance costs and equalize the running hours of your compressors.
- Monitor and control all compressors from one single touchscreen display.
- Optimize your compressors' performance by operating different control schemes.
- Control compressors of all types and brands.

Celebrating
120 YEARS
1901–2021

At Chicago Pneumatic, we have a passion for performance and long-lasting partnerships with our customers in industrial applications, construction, infrastructure and maintenance. Since 1901, we have been committed to reliability based on technology and trust.

At Chicago Pneumatic we have a passion for performance and long-lasting partnerships. Since 1901, we have been committed to reliability based on technology and trust.

People. Passion. Performance.

CP compressors are supported by a network of trained service technicians who can provide complete warranty support, spare parts and technical consultation. For more information on our products, please contact your CP territory sales manager or a local authorized CP distributor.

Care. Trust. Efficiency.

Care. Care is what service is all about: professional service by knowledgeable people, using high-quality Original parts.

Trust. Trust is earned by delivering on our promises of reliable, uninterrupted performance and long equipment lifetime.

Efficiency. Equipment efficiency is ensured by regular maintenance. Efficiency of the service organization is how Original Parts and Service make the difference

The Compressed Air and Gas Institute, CAGI, is an organization dedicated to improving the compressed air industry through established standards. As a proud member of CAGI, CP Compressors publishes all technical data in accordance with CAGI/PNEUROPN2CPTC2 guidelines and voluntarily allows products to be selected for participation in CAGI's Performance Verification Program. With CP Compressors, our customers know they are receiving the excellent performance that we publish.
