

FET Series

High Pressure Non Spill Quick Couplings

Connect with Confidence

Parker's FET Series couplings are built to be used in high pressure, high impulse applications that require the security of a threaded connection and the ability to connect and disconnect under residual pressure.

Manufactured from high grade materials, our FET Series couplings are built to be the work horse in the most demanding hydraulic applications. With a durable brinell resistant design and an unique stainless steel valve, these couplings provide a new level of performance in the coupling industry. Made in the USA, FET Series couplings are interchangeable with other European style thread-to-connect couplings.

FET Series Features:

- Up to 6000 psi operating pressure
- Connect under residual pressure up to 5000 psi
- Disconnect under residual pressure up to 2500 psi
- Interchanges with similar thread-to-connect couplings
- High impulse resistance
- High strength materials
- FNC coating for extended durability and corrosion resistance
- Robust threaded connection
- Visual connection indicator

Couplers

Internal Features:

- Smooth Flow path provides exceptional pressure drop
- High strength stainless valve
- Encapsulated washout resistant valve seal
- Non-spill valving
- Sealed interface thread
- Balanced connect under pressure valving

Nipples

RED O-RING PROVIDES VISUAL FULL CONNECTION INDICATOR AND INTERFACE THREAD SEALING

Internal Features:

- PTFE slipper interface seal
- Encapsulated washout resistant valve seal
- Pressure eliminator valving allows connection up to 5000 PSI with coupler drained to tank
- Non-spill valving

Applications:

Use Parker FET Series couplings for any high pressure, high impulse applications requiring the security of a threaded connection and the ability to connect and disconnect under residual pressure. Parker's FET Series are ruggedly designed and engineered to meet the requirements of the most demanding construction, oil & gas and mining applications.

FET Series – High Pressure Non Spill Couplings

- Mobile drill rigs
- Oil field equipment
- Wet lines
- Umbilical lines
- High impulse mobile circuits
- Power tongs
- Excavator attachments

Five convenient locations - same great service

Fremont
