

Dust, Fume & Mist Collection

Parker's DustHog is a high quality, precision-engineered dust collector used to meet the needs of virtually any application. Energy efficient and maintenance friendly, our dust collection units come standard with features like QuickSeal release doors and Cam-action locking bars for quick and easy filter changes, pressure gauges that indicate when cartridges need to be changed, and lightweight, easy to remove dust drawers. Parker DustHog utilizes pulse cleaning technology, which maximizes the cleaning power and energy delivered to cartridge filters, and provides complete surface cleaning, assuring years of dependable performance.

SMOGHOG®

Parker's SmogHog mist collectors are among the most effective and efficient in removing mist and smoke in the metalworking industry applications. SmogHog now offers Electrostatic Precipitators (ESP) and coalescing media filtration options. Different processes and fluid chemistry create a variety of contaminants and challenges. It is imperative that the right technology is applied to achieve a solution that is both effective and efficient.

Locations

We support our customers in the Western United States with a growing number of locations. When you visit one of our ParkerStores, you can count on quick, friendly service from one of our store professionals.

All of our ParkerStores stock products provide hose assemblies while you wait, adapters, and many Parker fluid connector products. Individual stores offer additional products and services to support the industries in their specific locations.
